

Assignment No. 3
Archan Mehta (201711014)
Dharit Parikh (201711022)

1. Implement `my2Dconv.m` that takes two 2D arrays `h` and `f` as an input and outputs $y = h * f$ as the output. Assume that the image is zero(black) outside the domain.

Figure 1: original image(pc7)

Figure 2: after convolution
